

# GIT (distributed)

Repo on Server (optional)  
(Backup / Connectivity)

## Undo

undo `git add <file>` : `git reset HEAD <file>`

undo `git commit` : `git reset HEAD~`

undo `git push` : May be possible, depending on rights (`--force`)

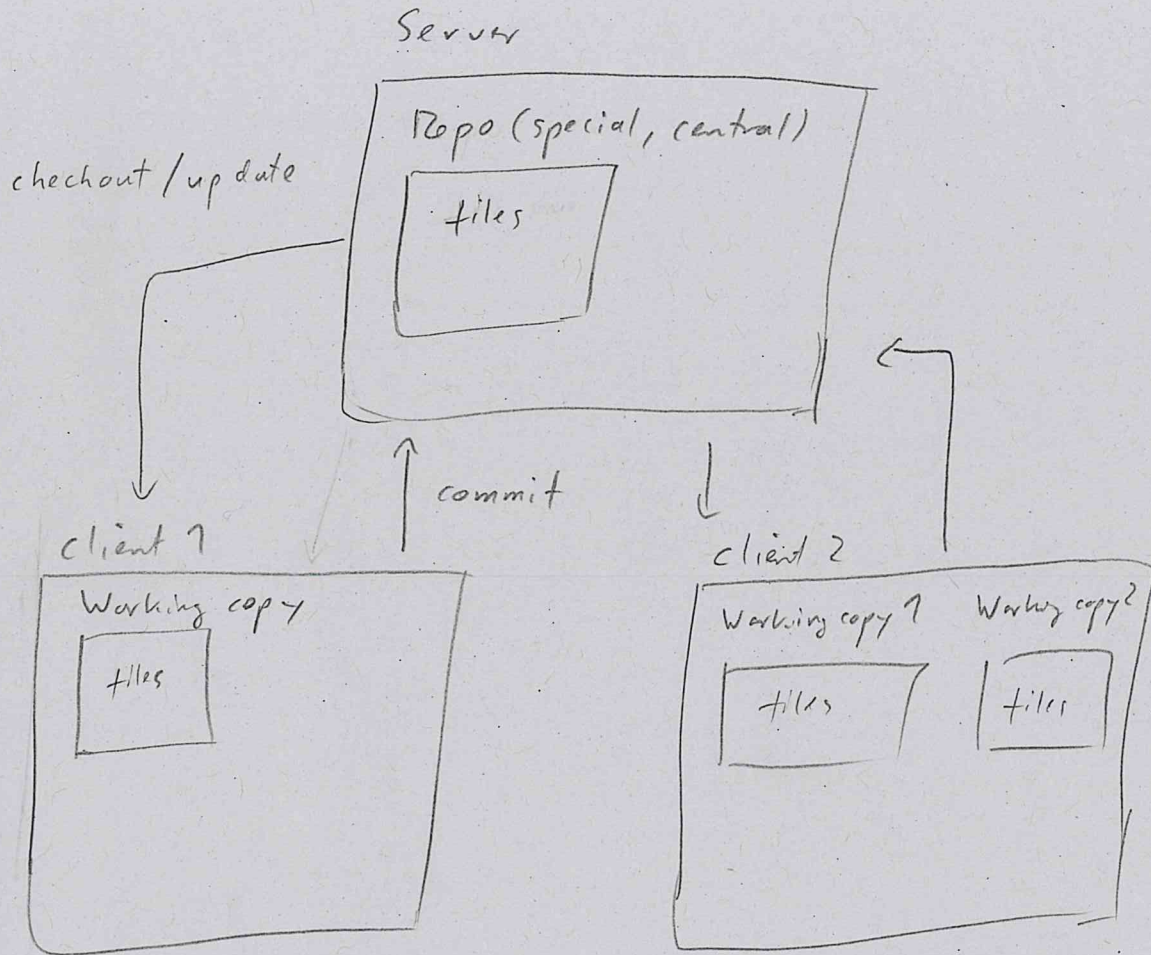

## Basics

`git status`  
`git log`

`git diff`  
`git diff --staged`

# SVN (centralized)

Repo = Repository

## Git (distributed)
